DETAILED ACTION

This is the second Office Action following the third Request for Continued Examination based on the 10/645055 application filed August 21, 2003. Claims 49, 50, 53-61, and 64-68 as amended November 18, 2010 are currently pending and considered below.

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 2. Claims 49, 50, 53-61, and 64-68 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.
- 3. Regarding independent claims 49, 60, and 68, the claims contain either the limitation "wherein the outer layer has a lesser thickness in the body portion than in the proximal waist" (Claims 49 and 68) or the limitation "wherein the outer layer has a lesser thickness in the body portion than in the distal waist" (Claim 60). The examiner notes that there is no discussion of the thickness of the outer layer of the balloon in the specification. If applicant is relying upon the drawings (specifically elected Figure 2) to support this limitation, the examiner notes that, as no mention that the figures are drawn to scale is given, the drawings can not be relied upon to support the above limitations.

Art Unit: 3763

Claims 50-59 and 61-67 are rejected for their dependence upon a rejected base claim. Applicant appears to be further relying upon the statement that the sum of the outer and inner layer thicknesses is "substantially constant" over the length of the balloon to support the claim limitations described above (in the manner that if the overall thickness T is constant, then T-T_{IB} must be less than T-T_{IW}), with T being only substantially constant, the equations fail as T is no longer a constant value.

Response to Arguments

4. Regarding applicant's argument that the drawings (namely, Figure 2) as presented satisfy the written description requirement and enable the claims as filed, the examiner continues to disagree. The examiner notes that, as there was no indication that the Figures of the instant application are drawn to scale, they can not be relied upon to teach such a relationship.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to VICTORIA P. CAMPBELL whose telephone number is (571)270-5035. The examiner can normally be reached on Monday-Friday, 7-3.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nicholas Lucchesi can be reached on 571-272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
